networks, with a particular eye towards expanding internet access into rural areas with limited and unreliable backhaul. Read [more](https://crm.apc.org/sites/all/modules/civCRM/extern/url.php?u=8919&qid=) (<https://crm.apc.org/sites/all/modules/civCRM/extern/url.php?u=8919&qid=>).

4. Research

- New release! The report "Bottom-up Connectivity Strategies: Community-led small-scale telecommunication infrastructure networks in the global South," conducted by Nicola Bidwell and Michael Jensen for APC and Rhizomatica, documents the benefits of, and challenges facing, small-scale, community-based connectivity projects. APC researchers visited 12 rural community networks in the global South in 2018 and studied a number of others through desk research and interviews. This research provides information that can be used for evidence-based policy making that will contribute to creating a more enabling environment for small, community-based local access networks. - This report by Research ICT Africa includes many recommendations around spectrum for community networks, and is a great read to unpack some of the issues reflected in community networks, such as urban-rural, gender, age and meaningful access.
